Play is an important part of life. It's how we first interact with the world, imagine new possibilities, and learn important life skills. Which is why we take play so seriously.

At Asweets, we're here to inspire today's children to become tomorrow's kind, curious, and creative adults through uniquely inspired, highly imaginative toys, play spaces, bedding, and décor for both child and baby.

From fresh takes on classics to the completely new, every piece is thoughtfully designed using simple materials like fabric and wood, not plastic and circuits—to stimulate development, fuel imagination, and open little hearts and minds to the wonders of the world.

## OH BABY!

This is where it all begins and where we start to interact with the world. Developmental milestones occur in the first year when babies learn to focus their vision, reach out, explore, and learn about the things that are around them. Cognitive development means the learning process of memory, language, thinking, and reasoning. The way we cuddle, hold, and play with baby will set the basis for how they will interact with others. The touch and feel of our baby toys help to enrich these milestones.
